GlobalXperts Detection and Response Solutions

GX Security is a cyber security advanced threat solution that visualizes, detects, and eliminates threats in Real-time. It provides a simple, comprehensive, fully automated approach to detecting and stopping the threats that matter, for both On-Premises and Cloud deployments.

A Lifecycle Approach to Handling Threats

THREAT MODELING
mapping telemetry data from a variety of sources to the MITRE ATT&CK Framework.

ENDPOINT SECURITY
utilizing third-party products or Seceon's agent-based and agentless technology for Windows, macOS, and Linux OS.

COMPLEX USE CASE SUPPORT
covering Data Exfiltration, Insider Threat and DDoS Attack detection using network traffic analysis.

SOAR
capabilities for custom policy creation, remediation, enforcement, and notification for appropriate action and governance.

CONTINUOUS REVIEW
providing threat intel and incident response to keep your solutions up to date.

About GlobalXperts XDR

GlobalXperts' XDR Solution leverages Seceon's aiXDR or aiSIEM to provide a complete threat detection and response solution that is customized to your organization. Seceon consolidates the capabilities of SIEM, SOAR, UEBA, NBAD, NTA, VA, TI, IDS, IPS, ML, AI, and EDR within a single platform, working in real-time, proactively, to keep you steps ahead of any attack occurrences. When combined with GlobalXperts' Onboarding and Support services, you'll have focused visibility into threats that target both on-premises infrastructure and cloud-hosted services; plus, all the support required to respond to issues, including remediation assistance.

GlobalXperts, Inc.
5540 Centerview Drive, Suite 200, Raleigh, NC 27606

We work with your IT team to ensure requests are completed in the shortest possible amount of time. Our engineers are certified and trained to solve critical issues and meet your installation requirements. This saves time for your IT team and reduces Infrastructure downtimes, helping your business quickly recover from outages.

The GlobalXperts Difference

GlobalXperts sets itself apart in the IT field as an Information Technology Solutions Provider specializing in CISCO solutions. We have a deep understanding of Enterprise Networking and Cloud Technologies that incorporate Collaboration, Data Center, Borderless Networking, Security Solutions, and products from leading equipment manufacturers.

WHY XDR WITH GLOBALXPERTS?

- Consolidates and monitors all products and tools through a single pane of glass

- Eliminates alert fatigue by using correlation, analytics, threat framework mapping, and threat intelligence to only alert on high-fidelity events

- Changes your threat detection methodology from static and reactive to dynamic and proactive

- Improves Time to Detect and Time to Respond

- Helps maintain compliance mandates

- Addresses Security expertise shortages through outsourced SOC option*

- Flexible log collection and analysis models (on-premises and/or Cloud-hosted)

- Includes GlobalXperts XDR success services:
  - Telemetry onboarding workshop including logging best practices review
  - Solution deployment and tuning
  - Regular threat summary and system optimization reviews

- Remediation Assistance Retainer*

- Security Assessment and Readiness Review*

*Value-added additional cost

USE CASES AND THREAT DETECTION ADDRESSED BY AIXDR:

- Cyber Crime
- Insider Threat
- Data Breach (Exfiltration)
- DDoS Attack
- Web Exploit
- Brute-Force Attack
- Vulnerability Exploit
- IoT - IIoT Security
- DNS Protection
- Endpoint Isolation
- Threat Containment
- Data Loss Prevention
- Deep Threat Hunting
- File Integrity Monitoring
- MITRE AT&CK TTPs
- Policy Enforcement (Network, Database, Internet, etc.)
